

Here is a sample report for Tejas student:

****Student Report****

****Student Name:**** Tejas Asawale

****Student ID:**** 858676ac-140f-4ff0-b8d3-7d0206af93f8

****Grade:**** 12

****Subjects:**** Maths, Accountancy

****Batch IDs:****

****Status:**** ACTIVE

****Address:****

****Date of Birth:****

****Joined At:**** 2026-05-22

****Admission ID:**** 7bf8dc31-a08c-4142-8c24-6dbc2514d37c

****Fees:****

* Total: 25000

* Paid: 25000

* Due: 0

****Target Exam:**** Maths

****Attendance:****

Date	Batch ID	Status
---	---	---
2026-05-23	b-001	PRESENT
2026-05-22	b-001	PRESENT
2026-05-21	b-001	PRESENT
2026-05-20	b-001	PRESENT
2026-05-19	b-001	LATE
2026-05-18	b-001	PRESENT
2026-05-17	b-001	LATE

2026-05-16 b-001 PRESENT
2026-05-15 b-001 LATE
2026-05-14 b-001 LATE

****Exam Results:****

Exam ID Exam Name Subject Batch ID Date Max Marks Marks
--- --- --- --- --- --- ---
e-001 Unit Test 1 — Mathematics Mathematics b-001 2025-02-15 50
e-002 Mid Term — Physics Physics b-002 2025-03-01 100
e-003 Unit Test 2 — Mathematics Mathematics b-001 2025-04-10 50
e-004 NEET Mock 1 — Biology Biology b-003 2025-04-20 360

****Invoice Details:****

Invoice ID Invoice No Student ID Student Name Grade Description Amount Paid Status Due Date

To generate this report as a PDF, I would use a library such as `fpdf` in Python. Here is an example code snippet:

```
```python
from fpdf import FPDF

pdf = FPDF()
pdf.add_page()
pdf.set_font("Arial", size = 15)
pdf.cell(200, 10, txt = "Student Report", ln = True, align = 'C')

pdf.set_font("Arial", size = 12)
pdf.cell(0, 10, txt = "Student Name: Tejas Asawale", ln = True, align = 'L')
```
```

```
pdf.cell(0, 10, txt = "Student ID: 858676ac-140f-4ff0-b8d3-7d0206af93f8", ln = True, align = 'L')
pdf.cell(0, 10, txt = "Grade: 12", ln = True, align = 'L')
pdf.cell(0, 10, txt = "Subjects: Maths, Accountancy", ln = True, align = 'L')

pdf.set_font("Arial", size = 10)
pdf.cell(0, 10, txt = "Attendance:", ln = True, align = 'L')
pdf.cell(0, 10, txt = "Date\tBatch ID\tStatus", ln = True, align = 'L')
pdf.cell(0, 10, txt = "2026-05-23\tb-001\tPRESENT", ln = True, align = 'L')
pdf.cell(0, 10, txt = "2026-05-22\tb-001\tPRESENT", ln = True, align = 'L')
pdf.cell(0, 10, txt = "2026-05-21\tb-001\tPRESENT", ln = True, align = 'L')

pdf.output("student_report.pdf")
...
```

This code generates a PDF file named `student\_report.pdf` with the student's report. You can customize the report by adding or removing sections, and by using different fonts and layouts.
